

Goblin Studio

brand story

Why Goblin Studios

Goblin Studios is a concept of passion, creativity, and the unusual. There is no straightforward idea on where design lies, but rather seeing it wherever we go. Goblin Studios observes the world around us, and pieces together the different cultures, stories, and communities.

I chose a geometric design to reflect the standards and guidelines that I put around myself and my creative process, lifting that content that it creates.

Font

80pt

Mars Standard

Display - Black

This font holds the same concept with an angled grid system that matches the logo and feeling of futurism and bold creativity.

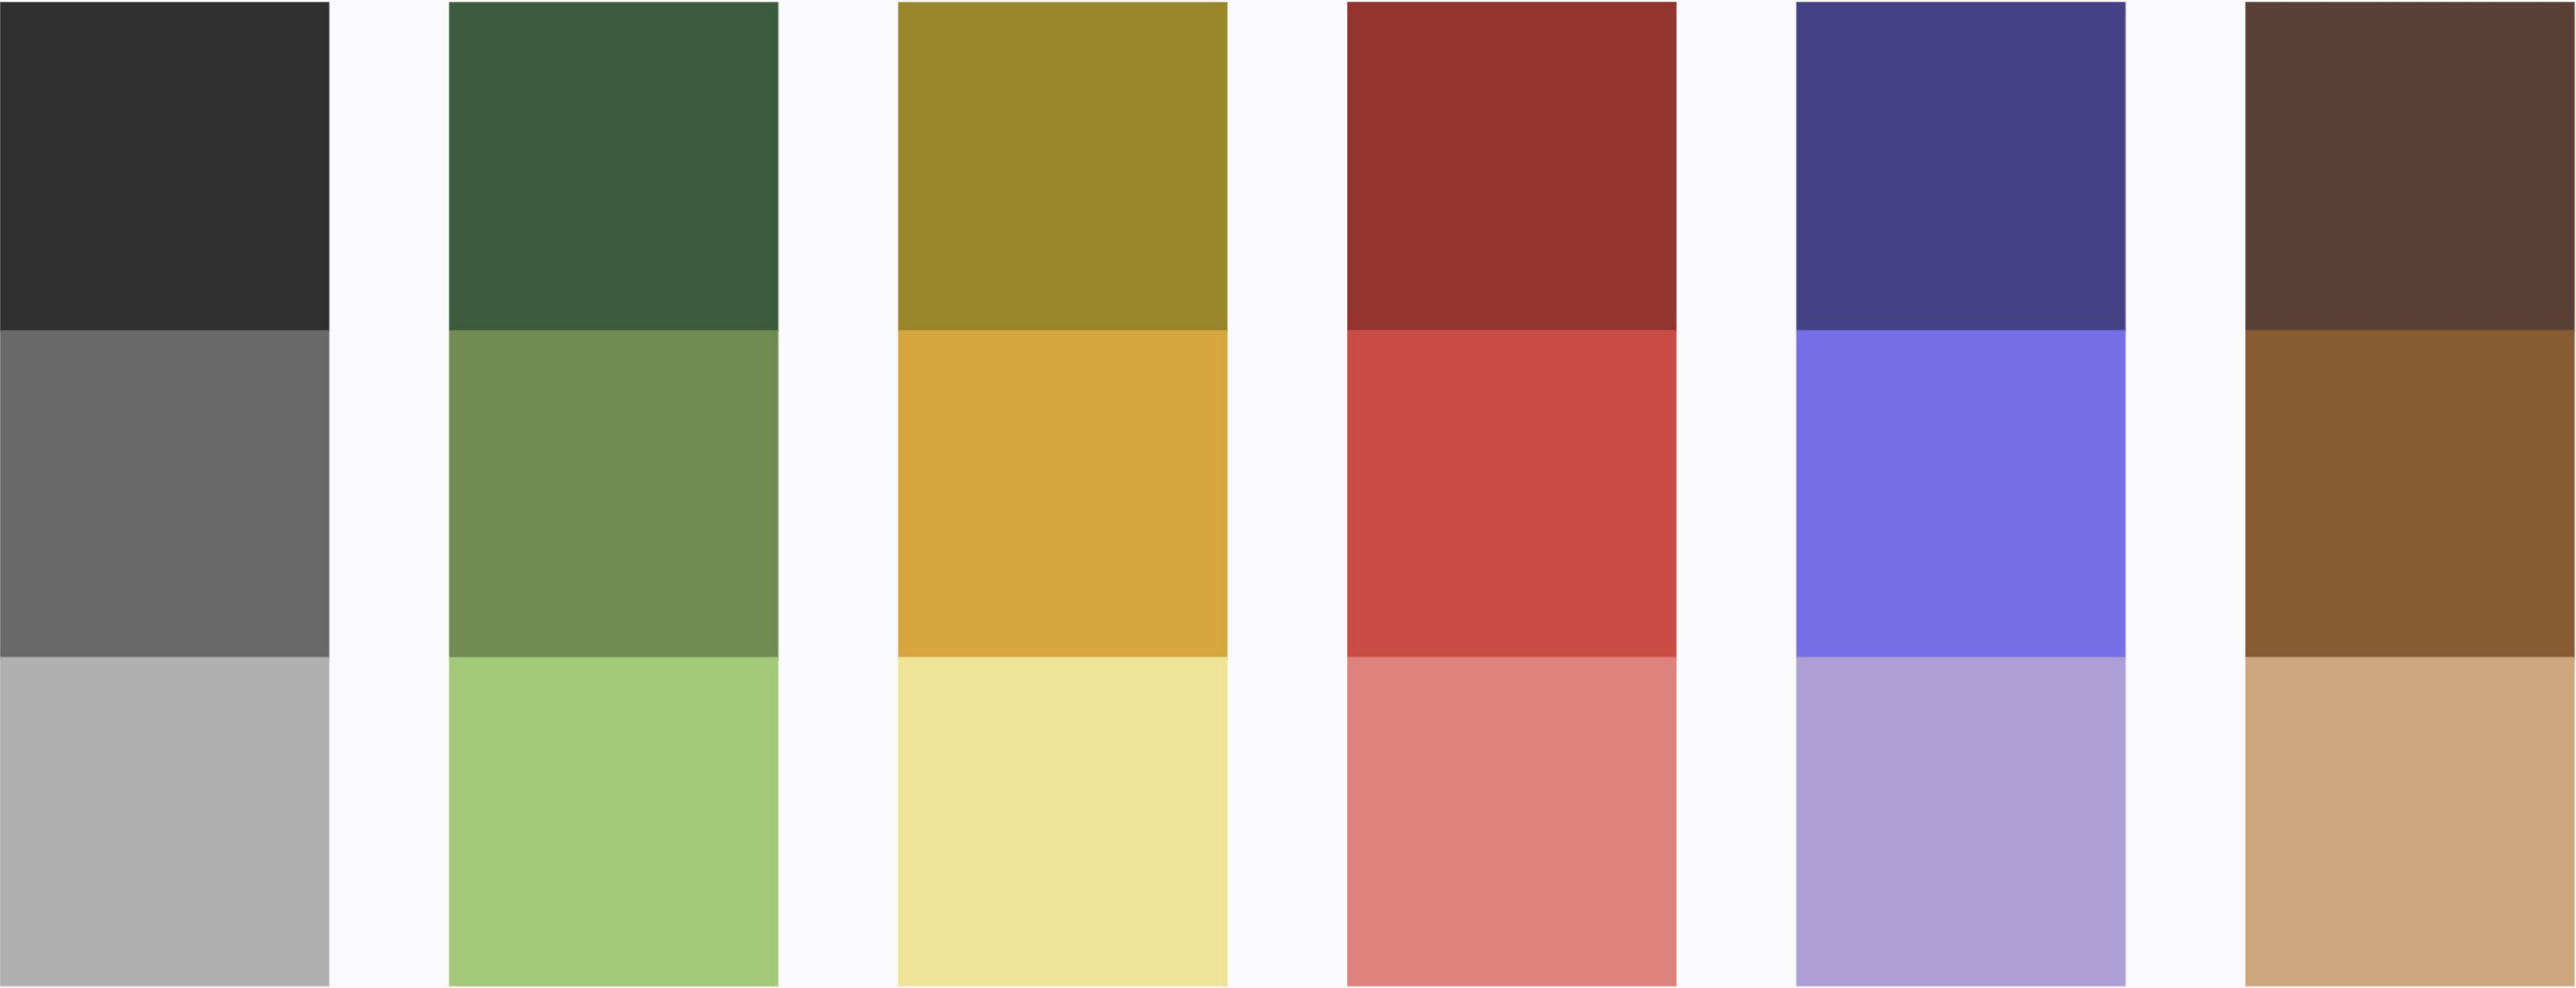

28pt - 36pt

Gotham

Standard - Book

Using this style maintains a simple look that is simple to read, conceptualize, and explore.

Color Palette

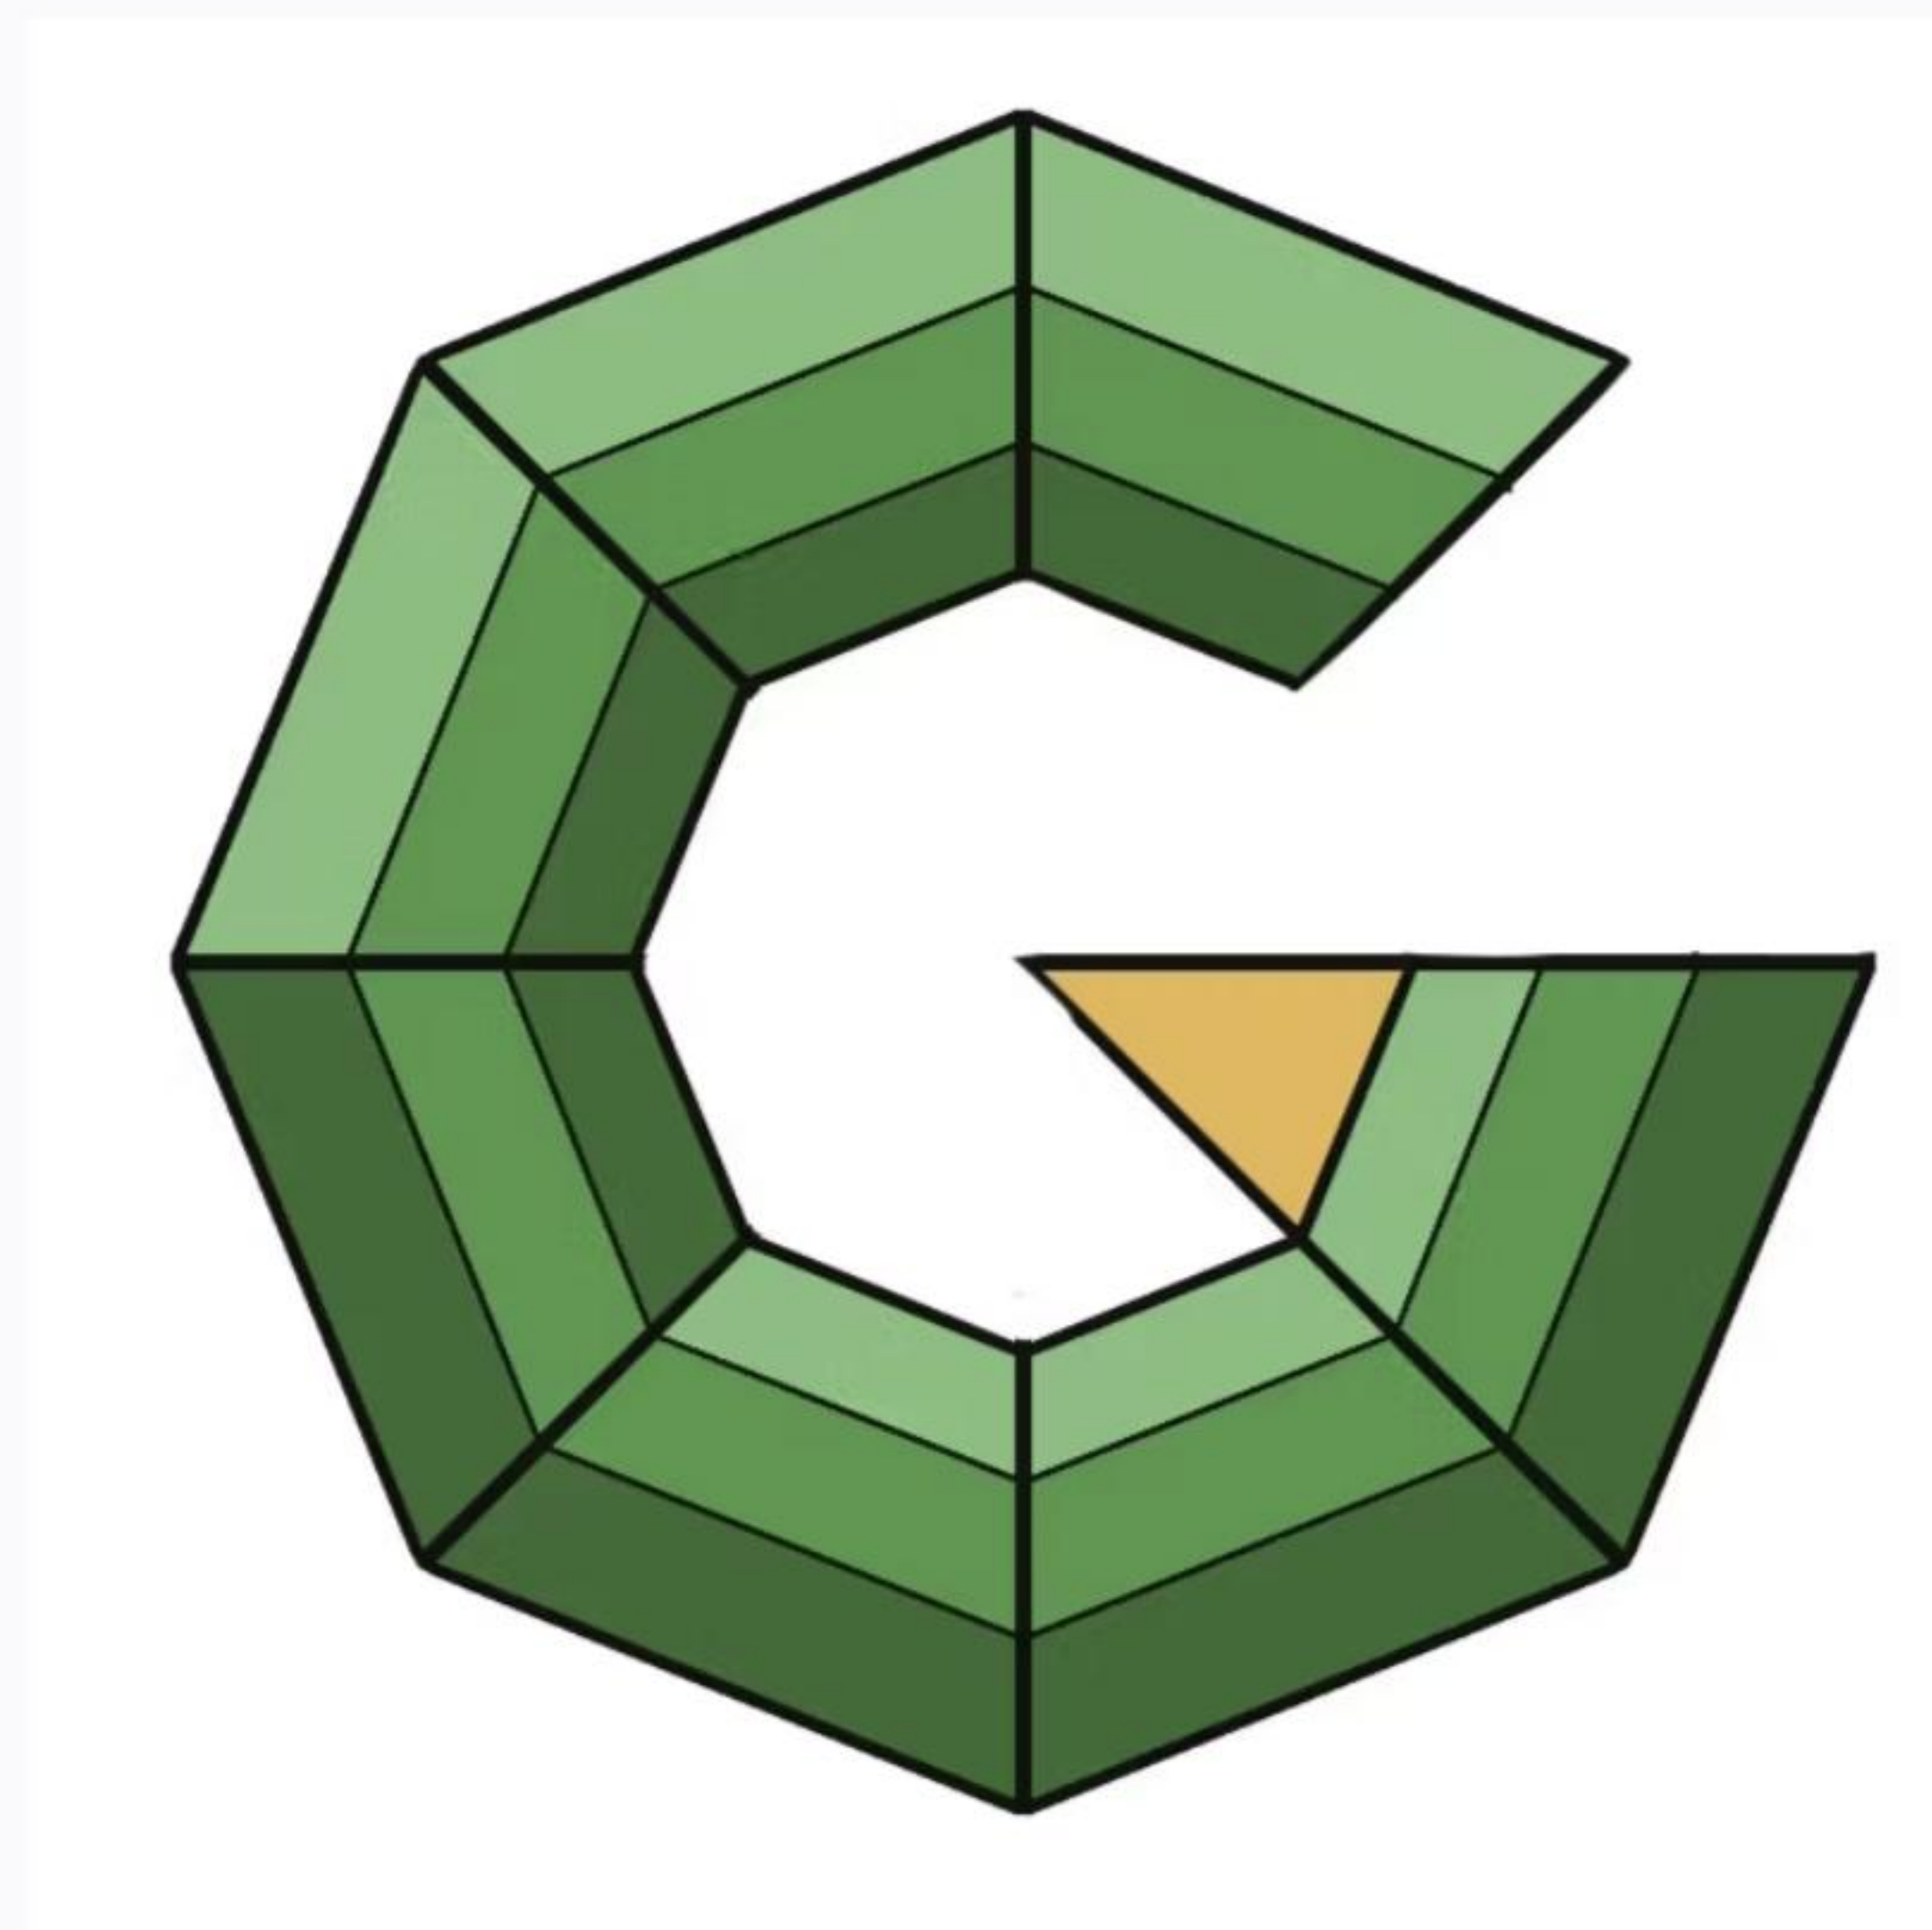

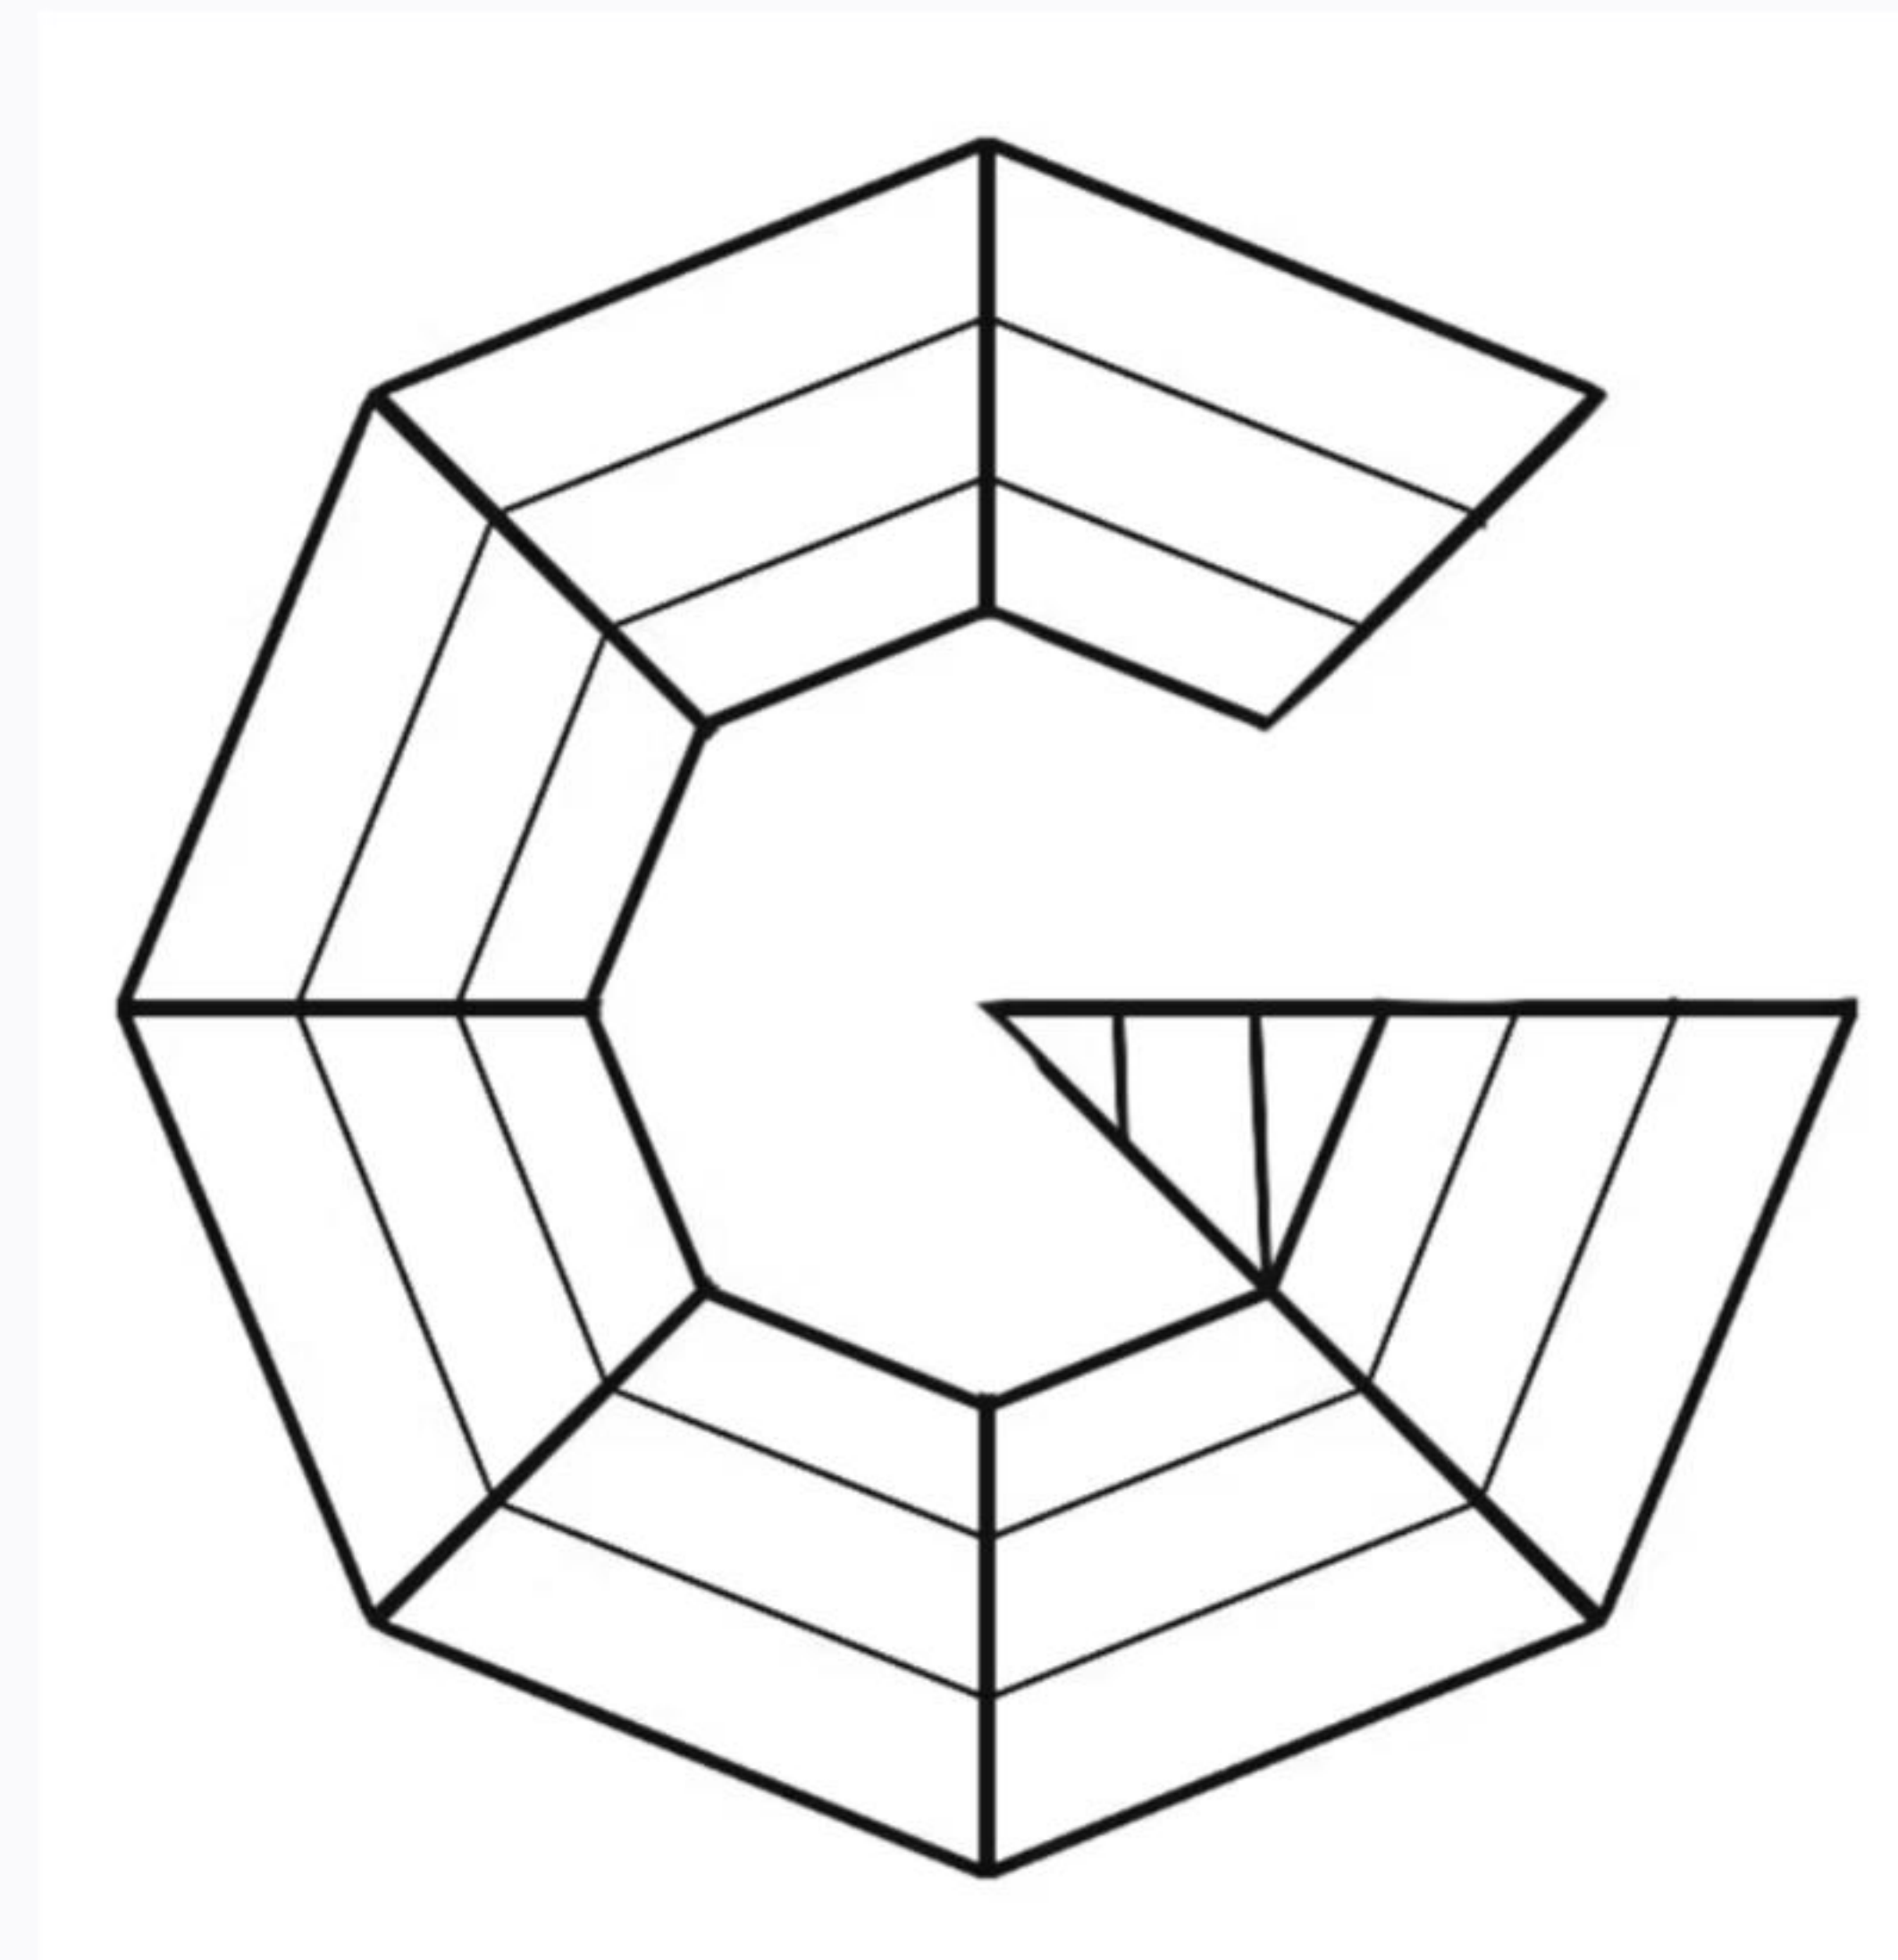

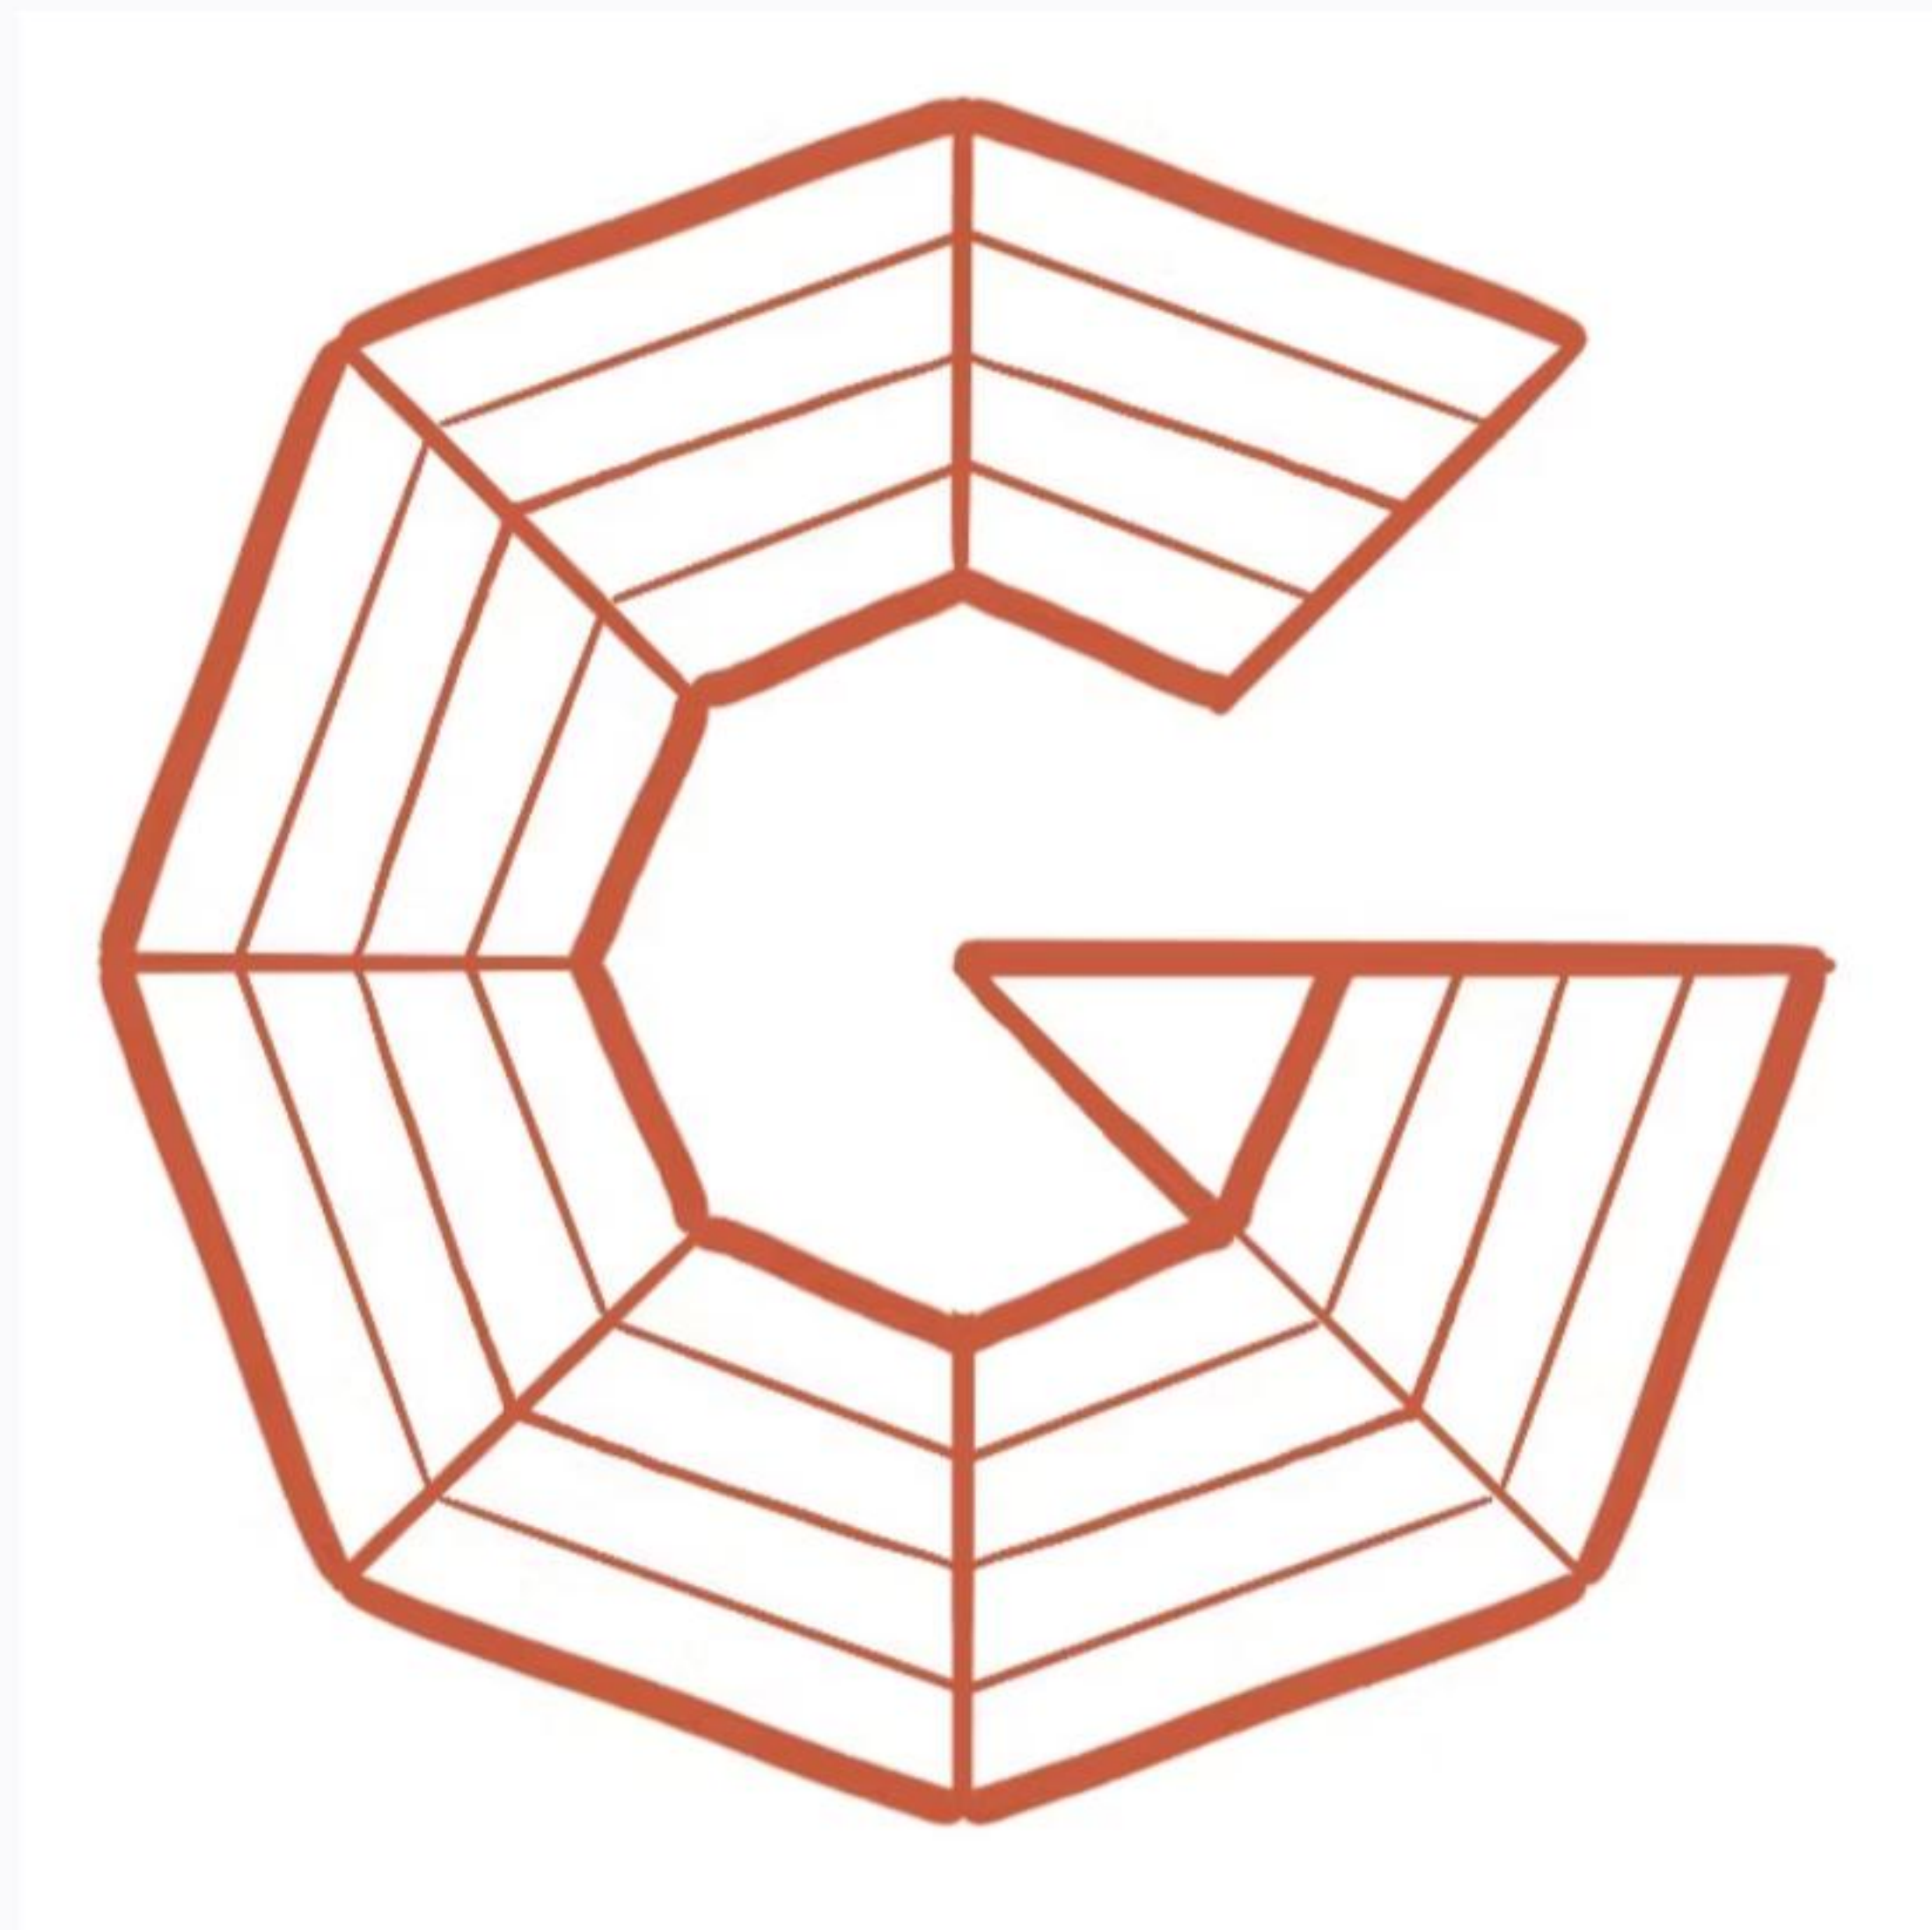

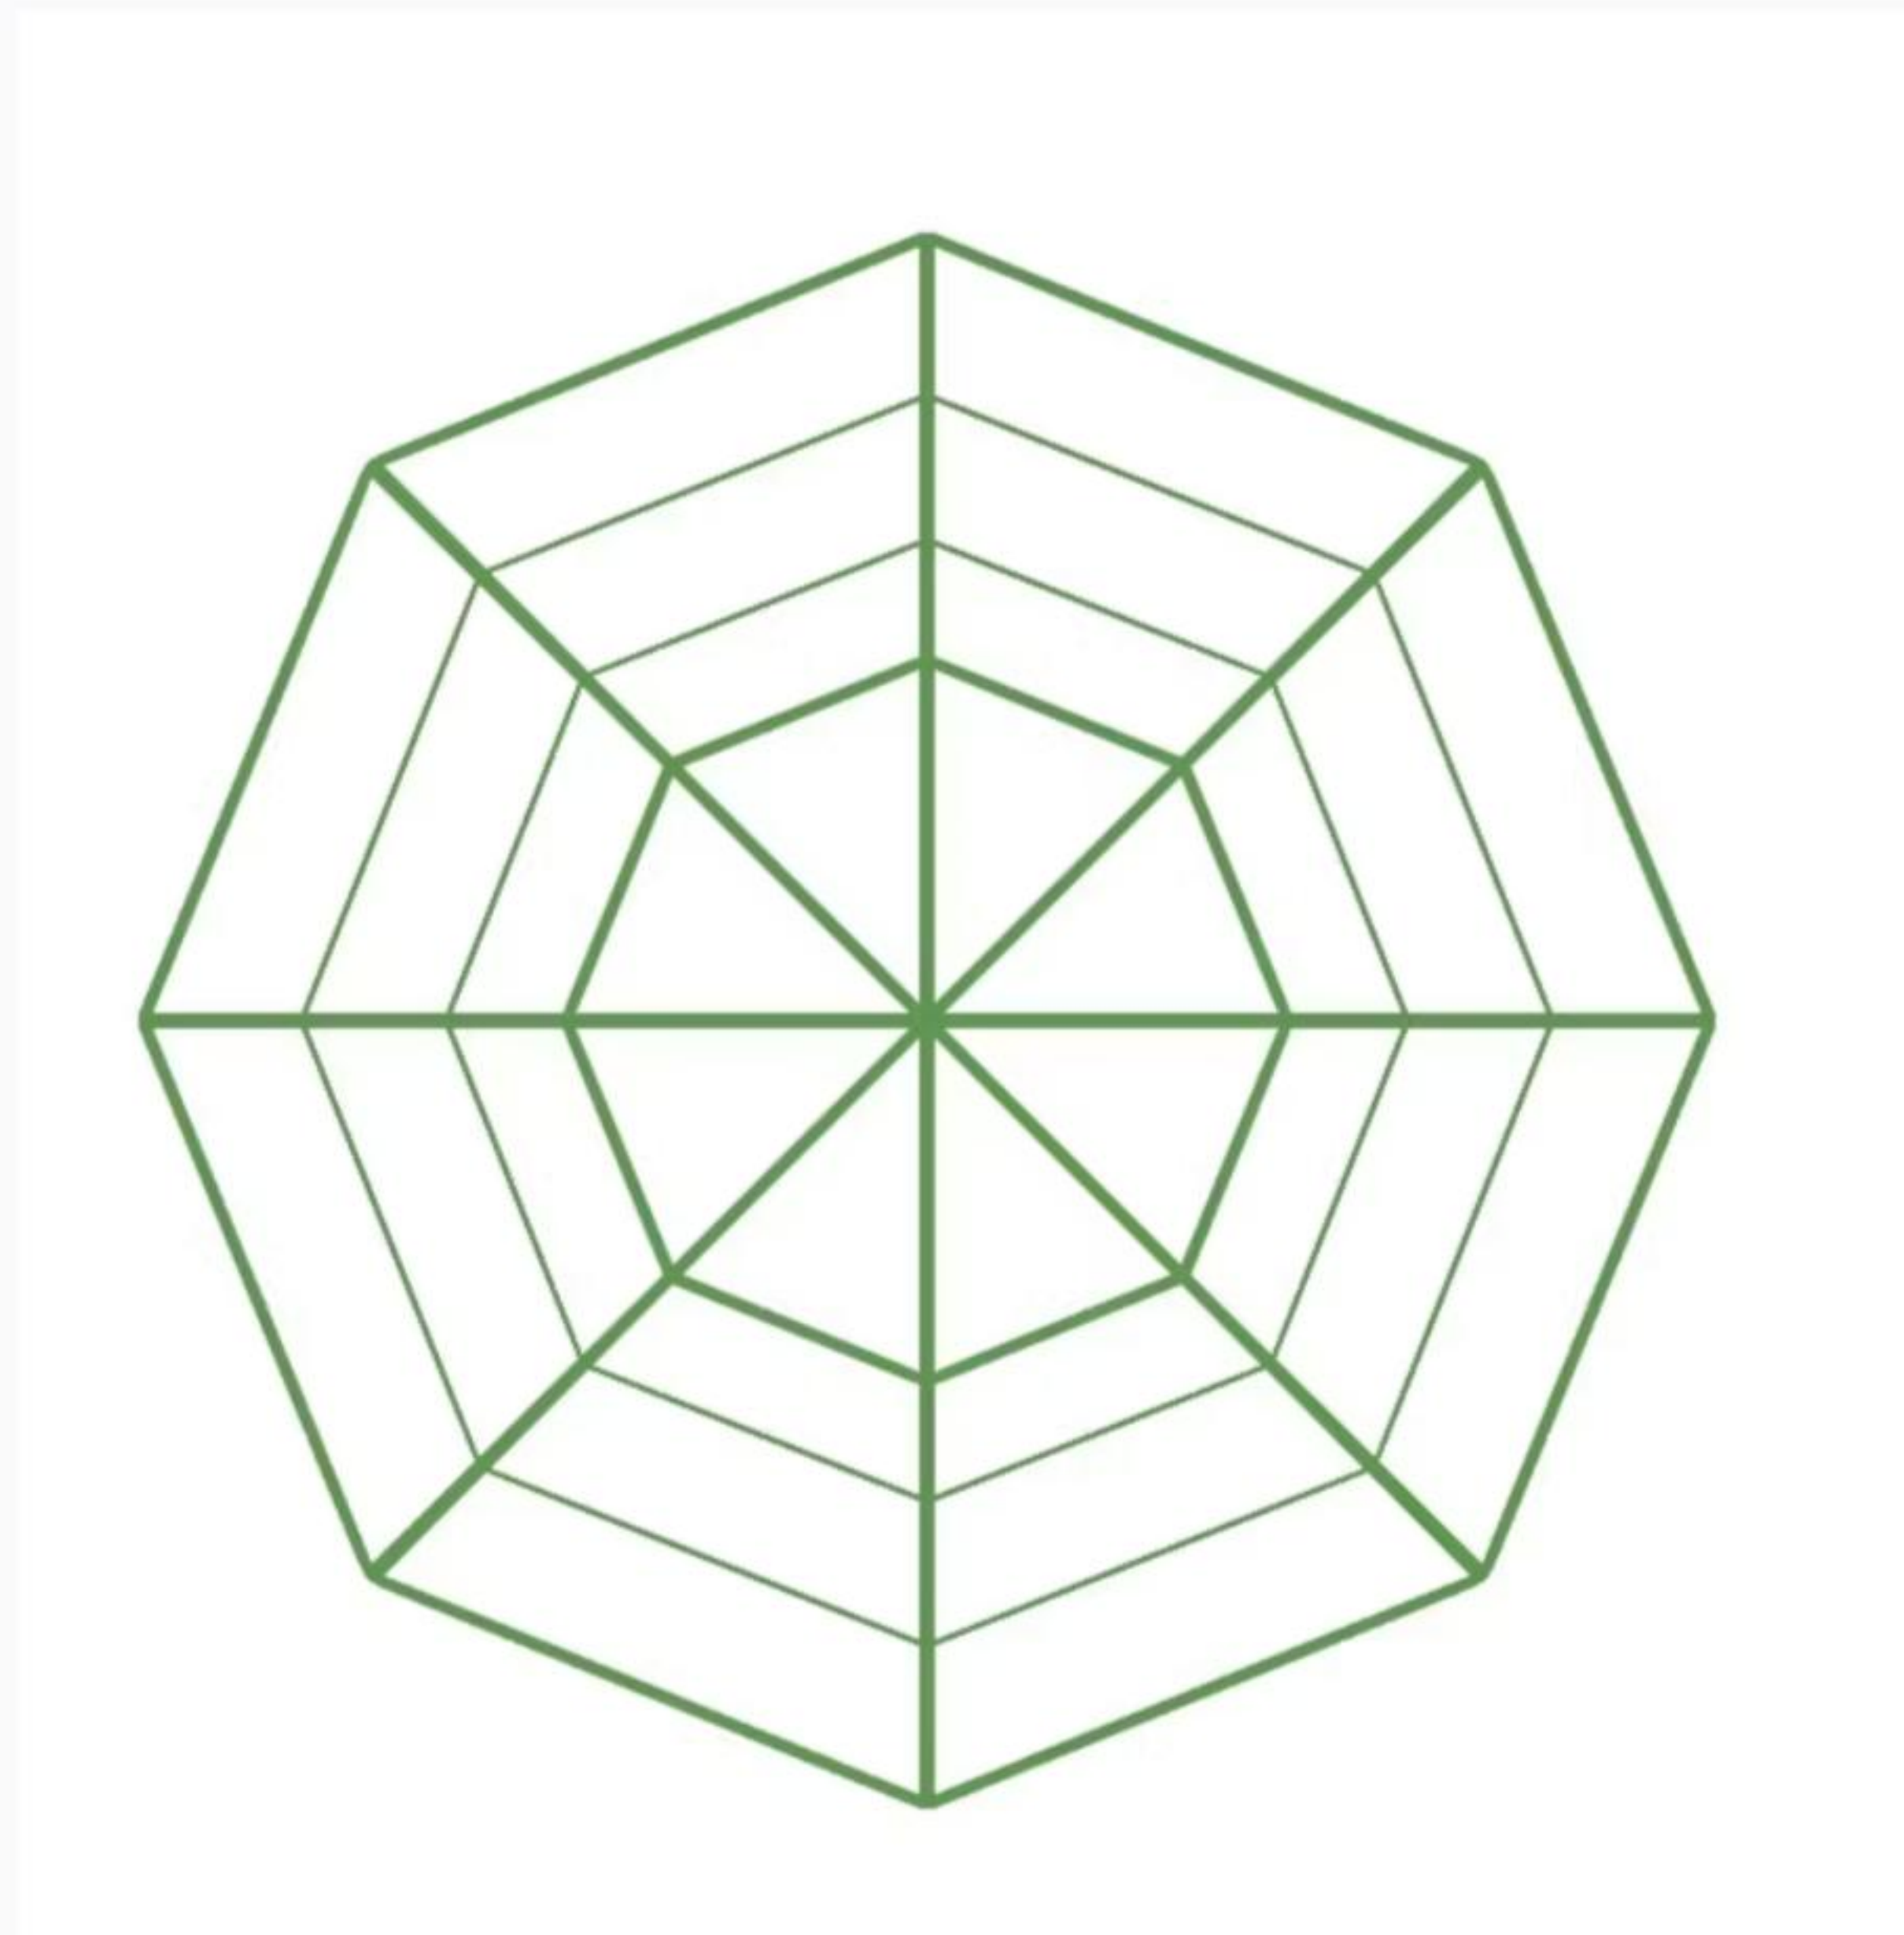

First try at icons

I started with exploring icons that fill in geometric shapes (circle, square, triangle, golden ratio, polygons).

Compositing

Animation

The animation begins with the fade at .10 intervals starting at .25, and points to the center after a .75s delay.
